

Arulmurugan C

Senior Product Engineer — Java Backend — Spring Boot — Microservices

+91 7397482264 | arulmurugantechie@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Senior Product Engineer with 5 years of experience designing and developing scalable, cloud-native enterprise applications using Java, Spring Boot, Microservices, REST APIs, Kafka, Redis, and SQL. Experienced in building distributed systems, optimizing application performance, implementing CI/CD pipelines, production troubleshooting, and delivering secure, resilient backend solutions using Docker and Agile methodologies.

TECHNICAL SKILLS

Languages: Java 8/17, Core Java, SQL

Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Spring MVC, JSP, Servlets

Backend: Microservices, REST APIs, OpenFeign, RestTemplate, Kafka, Redis, Multithreading, Asynchronous Processing

Databases: PostgreSQL, Oracle, MySQL, SQL Query Optimization, Indexing

DevOps & Monitoring: Docker, Kubernetes, Maven, Jenkins, Git, GitHub, CI/CD, Prometheus, Grafana

Testing & Tools: JUnit, Mockito, IntelliJ IDEA, Eclipse, VS Code, Postman, DBeaver

PROFESSIONAL EXPERIENCE

Softeon

Chennai, India

Sep 2021 – Present

Senior Product Engineer

Jul 2026 – Present

- Leading backend enhancements for the Distribution Module by delivering new business functionalities, resolving complex production issues, optimizing application performance, and driving architectural improvements.
- Deliver scalable Spring Boot microservices, REST API integrations, and production-ready backend solutions aligned with business requirements.

Product Engineer

Oct 2024 – Jun 2026

- Designed and implemented scalable Spring Boot microservices and RESTful APIs to support business workflows, database operations, and client-specific requirements.
- Implemented **Kafka-based asynchronous processing and multithreading**, eliminating response timeout issues, improving productivity, and reducing operator wait time.
- Implemented inter-service synchronous communication using Spring Cloud OpenFeign, enabling seamless integration between microservices while reducing boilerplate REST client code.
- Integrated Prometheus metrics collection and built Grafana dashboards to monitor API performance, service health, JVM metrics, and system utilization for proactive issue detection.
- Optimized database performance through SQL query tuning, indexing strategies, and JPA optimizations, improving application responsiveness and reducing execution time.

Software Engineer

Sep 2021 – Sep 2024

- Built and maintained backend services using Java, Spring Boot, Spring MVC, REST APIs, JSP, and Servlets for enterprise warehouse and distribution management applications.
- Migrated legacy JSP/Servlet-based functionalities to Spring Boot REST services, improving maintainability, modularity, API consistency, and reducing technical debt.
- With Git, Maven, Jenkins, and CI/CD pipelines to automate builds, deployments, and release management across multiple environments.
- Applied unit testing practices with JUnit and Mockito to validate the microservices.
- Provided production troubleshooting support by analyzing defects, resolving client-specific issues, and ensuring high application availability across environments.

PROJECTS

Book Seller Application — Java 17 — Spring Boot — Microservices — MySQL — Kafka — Docker | GitHub

- Designed and developed enterprise-grade microservices using Java 17, Spring Boot, Spring Data JPA, and REST APIs to manage books, users, shopping carts, orders, and inventory following clean architecture principles.
- Implemented JWT-based authentication, API Gateway, Kafka-driven messaging, Redis caching, Docker containerization, centralized exception handling, request validation, and OpenAPI documentation for secure, scalable services.

EDUCATION

Panimalar Institute of Technology

Bachelor of Engineering in Electrical and Electronics

2021

Chennai, India
